BULBS

for Fall Planting

DANISH SEED CO.

1946-BULB LIST

We are glad to submit this list of imported Dutch bulbs for your consideration. As you will notice we have many of the newer and better varieties which have been developed in the Netherlands the last few years. What we tried of these newer varieties last season showed them to be very good. The grade of the offered bulbs is what in Holland is called "Top Grade" except as noted, and no better can be had.

The shipments are due to arrive here in September. Early selections and orders will be appreciated.

The figures in parenthesis indicate approximate height.
